# ELECTRO-STATIC DEEP CLEANING

**KILLS & PROTECTS AGAINST 99.9% OF KNOWN VIRUSES & BACTERIA INCLUDING CORONAVIRUS FOR UP TO 28 DAYS.**

For extra peace of mind during the pandemic, our Electro-Static Deep Cleaning service can be rapidly deployed and is clinically proven to disinfect & sanitise all surfaces within our Toilets & Showers.

Kills 99.99% of bacteria & destroys viruses (such as coronavirus) within minutes of contact to provide prolonged antimicrobial protection on hard surfaces for up to 28 days.

Patented technology meets EN 1276, EN 14476, EN 1650, EN13704 and EN 14348 standards.

Cost-effective solution for enhancing sanitation protocols within COVID-19 risk assessments to maximise the safety and well-being of all users of the equipment.

A single deep cleaning treatment uses 360° 3D wrapping electro-static spraying technology to get into the most difficult to reach areas harbouring nasty germs to provides 24/7 protection.

Our products are non-toxic, non-corrosive, alcohol-free, fragrance-free and do not carry a hazardous warning identification symbol, making them completely safe to use, including around children and pets.

Electro-static spraying can be completed rapidly and efficiently with minimum client disruption both prior to delivery and also on-site for long-term equipment rentals.

With multiple applications, electro-static spraying can be undertaken in a wide range of settings including portable toilets, shower blocks, kitchen areas, vehicles, schools, hospitals and offices to name a few.

All equipment and areas that are electro-statically deep-cleaned display a label with a 'date cleaned' to provide a reminder for when the next deep clean should be scheduled.

**Please contact our Team for Further Details and Pricing.**
